

SELECTIVE CALL FORWARDING**ABSTRACT**

- 5 A method and implementing system are provided in which a user to a telephone call forwarding service is enabled to designate selected caller phone numbers which the user wishes to have forwarded to a specified number which is input by the user. In an exemplary embodiment, a user menu
- 10 is communicated to the user and the user is enabled to input a new phone number to which the user wishes to have selected calls forwarded. The user is further enabled to input the selected caller phone numbers which are to be forwarded to the new number, and all other calls are handled in
- 15 accordance with a predetermined process such as voice mail.
